Birds of Adkins Arboretum

A Field Checklist

Prothonotary Warbler

ADKINS ARBORETUM
 12610 Eveland Road, Ridgely, MD 21660
 410-634-2847
 adkinsarboretum.org

Welcome to Birding at Adkins Arboretum

Adkins Arboretum's 400 acres of native meadows, wetlands, thickets, and young and mature woodlands attract an ecologically significant diverse population of bird species. Five miles of paths provide visitors access to observe and learn about both resident and migratory birds. The Arboretum is committed to protecting habitats for nesting, wintering, and migratory stopover sites to ensure the survival of diverse and viable populations of birds.

The Visitor's Center has a sightings book to record your findings and to learn about what others are seeing. This bird list includes birds that have been seen or heard on the Arboretum grounds, but potentially any bird seen in Maryland could be seen or heard at the Arboretum. Please notify the Arboretum staff when birds not on this list are seen.

While visiting the Arboretum, notice which birds inhabit meadows, woodlands and gardens. Consider how you can support a diversity of birds in your garden or community by protecting natural areas and planting native plants.

Visit www.adkinsarboretum.org to learn about upcoming guided bird walks and related programs.

Tuckahoe Creek Important Bird Area (IBA)

As part of the Tuckahoe Creek Important Bird Area, designated by the Audubon Society, the Arboretum supports significant populations of a number of forest interior-dwelling species, including Prothonotary Warbler and Kentucky Warbler. These species, which have been placed on the Audubon American Bird Conservancy Watch List due to steadily declining populations, inhabit the beautiful deciduous floodplain forest along Tuckahoe Creek accessed on the North Tuckahoe Trail, South Tuckahoe Trail, and Creekside Walk.

The IBA Program began in the 1980s and now involves 100 organizations worldwide, existing on every continent with over 10,000 IBAs identified. Visit www.audubonmdc.org/SciCon_IBAs for more information about this program.

Kentucky Warbler

KEY

Occurrence

- SP** Spring—period of spring migration (depending on species) from mid-February to early June
- S** Summer—June to August
- F** Fall—period of fall migration (depending on species) from mid-July to November
- W** Winter—December to February

Abundance

- C** Likely to be seen or heard in suitable habitat
- U** Present, but not certain to be seen or heard
- O** Seen only few times during season
- R** May be present but not every year
- X** Accidental: has been seen only once or twice
- *** Nests on Adkins Arboretum
