FOR IMMEDIATE RELEASE

The Scientific Method for Homeschoolers Begins Sept. 15 at Adkins Arboretum

Uncover the fascinating origins of modern science with a glimpse into the past when Adkins Arboretum offers The Scientific Method for Homeschoolers, an eight-week program beginning Sept. 15.

In this series, homeschool students ages 7 to 14 will journey from the birth of science in ancient Mesopotamia to science in the 21st century, with stops along the way in ancient Greece, the Middle Ages, the Scientific Revolution and The Age of Reason. Delving into the components of the scientific method, students will learn key scientific vocabulary and conduct experiments. They will use their newfound knowledge in the field, working in teams to create and test hypotheses related to the Arboretum’s forest, wetland, meadow and stream habitats. The program will culminate in a science fair showcasing team projects. Reading activities will be part of each class. Classes will meet on Tuesdays from 1 to 2:30 p.m., Sept. 15 to Nov. 3.

The series is $55 for members and $70 for non-members. Advance registration is required at adkinsarboretum.org or by calling 410-634-2847, ext. 0.

###

Adkins Arboretum is a 400-acre native garden and preserve at the headwaters of the Tuckahoe Creek in Caroline County. Open year round, the Arboretum offers educational programs for all ages about nature and gardening. For additional information about Arboretum programs, visit adkinsarboretum.org or call 410-634-2847, ext. 0.
