FIND THE ROAMING GNOME

In honor of Fairyfest, a friendly garden gnome will be hidden along the Arboretum’s paths each week during the month of October. Follow the clues to find out where our roaming gnome is this week.

This week the gnome has found his nook upon the Meadow Overlook, where golden grasses bend and sway, and in the evening foxes play.

Remember: gnomes do not like to be touched! Please stand at a respectful distance when taking your picture with the gnome. To play along with others and let us know you’ve found our enchanted friend, be sure to add #adkinsarboretum to any social media posts.
