

# Adopt a Tree

Find a tree on your nature walk to “adopt.” Sketch or photograph your tree. What does your tree feel like? Does it have a smell? About how tall is your tree? Make a bark rubbing. Are there any animals under the bark or on the leaves and branches? Mimic the shape of your tree with your body. Identify your tree. Name your tree.

Be sure to return at other times of the year to visit your tree. How has it changed? Record your observations.
